Senior .Net Developer/Consultant w SharePoint

DEPICTION:
Immediate career opportunity! Trillium Teamologies, Inc., recently certified as a **WBE** – is transforming and re-inventing how services and consulting are delivered. We have _immediate_ career opportunities for highly motivated, self-starting, passionate people who are willing to do whatever it takes to get the job done… and done right! Keep Calm and Exceed!

EDUCATION:
- Bachelor's degree in Computer Science, Mathematics or related discipline preferred
- Advanced Degree or equivalent experience & certifications a plus

REQUIRED TECHNICAL BACKGROUND:
- Must be able to anticipate project needs, discern work priorities, and meet deadlines with little supervision while working occasional evenings and weekends as necessary
- Exceptional analytical and problem solving skills
- Possess 5 years' experience in working with SDLC
- Minimum 5 years' experience in developing and delivering custom solutions in ASP.NET, C#, Windows server technologies, SQL Server, ADO.NET, SOAP, XML
- Significant experience with Web Services, SQL Server Reporting Services and SQL Modeling & Implementation
- Experience with JavaScript / JQuery/AJAX/CSS/Layout Master/EDI
- Excellent knowledge of Microsoft Visual Studio development platform and supporting technologies, including:
    - SQL Server 2008R2/2012
    - .Net Framework 2.0/3.5/4.x
    - Internet Information Server
    - Active Directory
    - Microsoft Office desktop application integration with SharePoint
    - Windows Workflow Foundation
    - Server farm design concepts
    - Windows networking principles
    - Federated Services
    - Rights Management
- Experienced in the design of collaboration solutions based on information architecture, taxonomy analysis and functional requirements development
- Experienced at creating custom SharePoint Web Parts
- Capabilities in the analysis, design, development and implementation of SharePoint 2010
- Experience with data modeling, architectures and frameworks
- Experience with unit testing frameworks, application/database profiling and static code analysis
- Experience and a comfort zone in acting as the delivery team lead or the architect/developer and/or the chief cook & bottle washer depending on the day and situation

PREFERRED PERSONAL SKILLS:
- Must be a self-motivator with the ability to set and meet deadlines on multiple projects without frequent supervision
- Dedication to active learning and growth in your technical, personal and professional skills
- Proven ability to take a leadership position as well as the ability to participate as part of a team
- Must have a true passion for business and technology consulting, including strong desire to make a real difference at TTI and for our clients

- Desire and ability to assist others on the team
- Have an infectious, positive attitude
- Conscientious, earnest and committed demeanor
- Capability to describe the solution in technical terms and then to bring it down to the business leaders and explain it in layman's terms when needed
- Excellent communication (written and oral) and interpersonal skills
- Strong organizational, multi-tasking, documentation and time-management skills
- Knowledge of automotive manufacturing a plus

EXPOSURE TO:
- SharePoint 2013/Office 365/Azure
- MVC, MVVM
- Delivering SharePoint Deployment Planning Services (SDPS) as part of technical pre-sales support
- Client technical management

CONTACT:

Do you want to follow, or be a leader? Are you a specialist, or perhaps an expert generalist? Do you like working inside a box or do you define the "box"? Are customer meetings daunting or exhilarating? Is it all about the big picture or the details? Do you consistently delivery on-time, on-budget, and with the highest quality? Are you comfortable with the status quo, or do you prefer striving for self-improvement? Do you subscribe to pessimism, or are you in charge of your own career? Are you able to persevere with integrity? Can you support your convictions with data? Do you believe in personal accountability and transparency in your work?

TTI is the trusted partner many companies rely on to deliver the right technology-based business process and productivity solutions. The right person for this role will bring an arsenal of capable knowledge which they'll draw from to design, develop, diagnose and resolve with a sincere drive and desire to create the "box" for the future.

In this team role you will leverage and develop your expertise and experience in this diverse leading role, where you will be deeply involved in all facets of a project life-cycle; from initial sales presentations, right through to the customer acceptance of the final deliverables. You will find yourself responding to RFP/RFQs, analyzing business requirements, writing detailed scope documentation, architecting phenomenal solutions, managing projects, testing systems, supporting customer systems, and most importantly building software and services. Successful potential teammates will have applied their technical skills in an internal or external customer (billable services) and implementation environment, have excellent written and verbal communication skills, superb problem diagnosis & resolution abilities and are resourcefully innovative.

Please forward updated credentials and an introduction as to why you are the right future TTI teammate for us to:
